09/ 456340

ABSTRACT OF THE DISCLOSURE

A method of correcting errors of a flash memory comprises steps of modifying the data of a group of memory units, each having a plurality of flash memory

5   cells adapted to erasing data therefrom and writing data therein, checking for the presence or absence of an error of not properly modifying the data of the group of memory units and determining the completion of proper modification of the data of the group of memory

10   units provided that an error is detected and the error can be corrected.
